

Q. Why does my phone chirp once or not ring at all?

If your phone is ringing only one short chirp then stops ringing or not ringing at all however the line button is lighting up, your ringer may be turned off. Please check your RINGER volume to ensure it is on.

To check **RINGER** volume:

1. Leave handset down
2. Press **VOLUME (+)** button and confirm LCD display does **not** show ringer volume set to 0.
3. Call your phone to make sure it is ringing again.

A phone's RINGER volume set to 0 will turn off ringer.
