

Can I make all my DX phones have the same button mapping without having to change each one individually?

From any phone - with the handset hung up and phone is idle:

Press **FEATURE**

Press **#**

Press **\***

The phone will display **DB Password** –

Enter the Data Base Password: Press **#####** (the pound sign 8 times)

Press **08 13**

Press **SAVE**

The phone will display **FEATURE KEY COPY**

Press **SHOW**

The phone will display **INDIVIDUAL COPY**

Press **SHOW**

The phone will Display **COPY FROM**

Enter (the extension number of the phone you want to copy from) e.g. **101**

Press **SAVE**

The phone will display **COPY TO**

Enter the stations to which you want to copy the button mapping to one at a time

eg. **102 SAVE**

**103 SAVE**

**104 SAVE**

etc until you are done with the stations you want to change

When you are completed

Press **HOLD**

Press **HOLD**

Press **HOLD** (press the hold button 3 times)

And

Press **SPK** (Speaker) button
